Preparation for Spring!

The following are the mitigative actions that the Government of Saskatchewan and the Water Security Agency suggest residents undertake:

- Shovel or remove snow from around your home and move it to the outer perimeter of your property
- Clear channels in the ice/snow to allow water to drain away more effectively from your home
- Ensure downspouts are extended so they discharge at least 2 metres from your home to avoid it draining back towards your foundation.
- Check to make sure your sump pump is working. If you do not have one, consider installing one.
- Make sure you have a Sewer Backwater Valve to protect against sewer backup.
- Keep basement sewer caps in place.
- Check your basement often.
